MySQL

Git

Angular

Linux

Docker

OpenAPI (Swagger)

React

LANGUAGES

Slovak

English (B2)

HOBBIES

podcasts, Medium articles,
skateboarding, volleyball,
tasty pizza

PROFILE

I decided to start programming in 5th grade and I didn't stop since then. I have tried coding my own website using HTML, CSS, PHP and MySQL. Time passed and I learned Javascript to add dynamic elements to websites. In addition to websites, I also looked into programming games in Unity and creating game extensions for Java games. Last but not least, I learned to work with microcontrollers such as Arduino and Raspberry Pi which gave me a basic understanding of the Internet of Things. Every new skill I got pushed me further and further but working on backend in Node.JS felt great and I have been improving my skills with this language for years.

EDUCATION

Stredná odborná škola, Ostrovského 1, Košice

September 2016 — May 2020

I have successfully graduated the maturita exam after 4 years of study. I not only learned to speak the English language on level B2 but also obtained theoretical knowledge about networking, databases and programming. Meanwhile studying on this school I was able to get the Cisco CCNA 1 certificate.

COURSES

Cisco CCNA 1, Cisco

September 2016 — June 2017

INTERNSHIPS

Backend and frontend developer at Bart.sk, Košice

July 2018 — August 2018

I was a member of a small team which developed e-shop in 2 months. My main focus was to prepare API server using technologies Node.JS, MySQL, Docker, Swagger and OpenAPI.

EXTRA-CURRICULAR ACTIVITIES

Web developer for University, Košice

September 2019 — December 2019

Fullstack developer for multi-media content creator

January 2020 — April 2020
